

BIG PLANS?
The right partner.

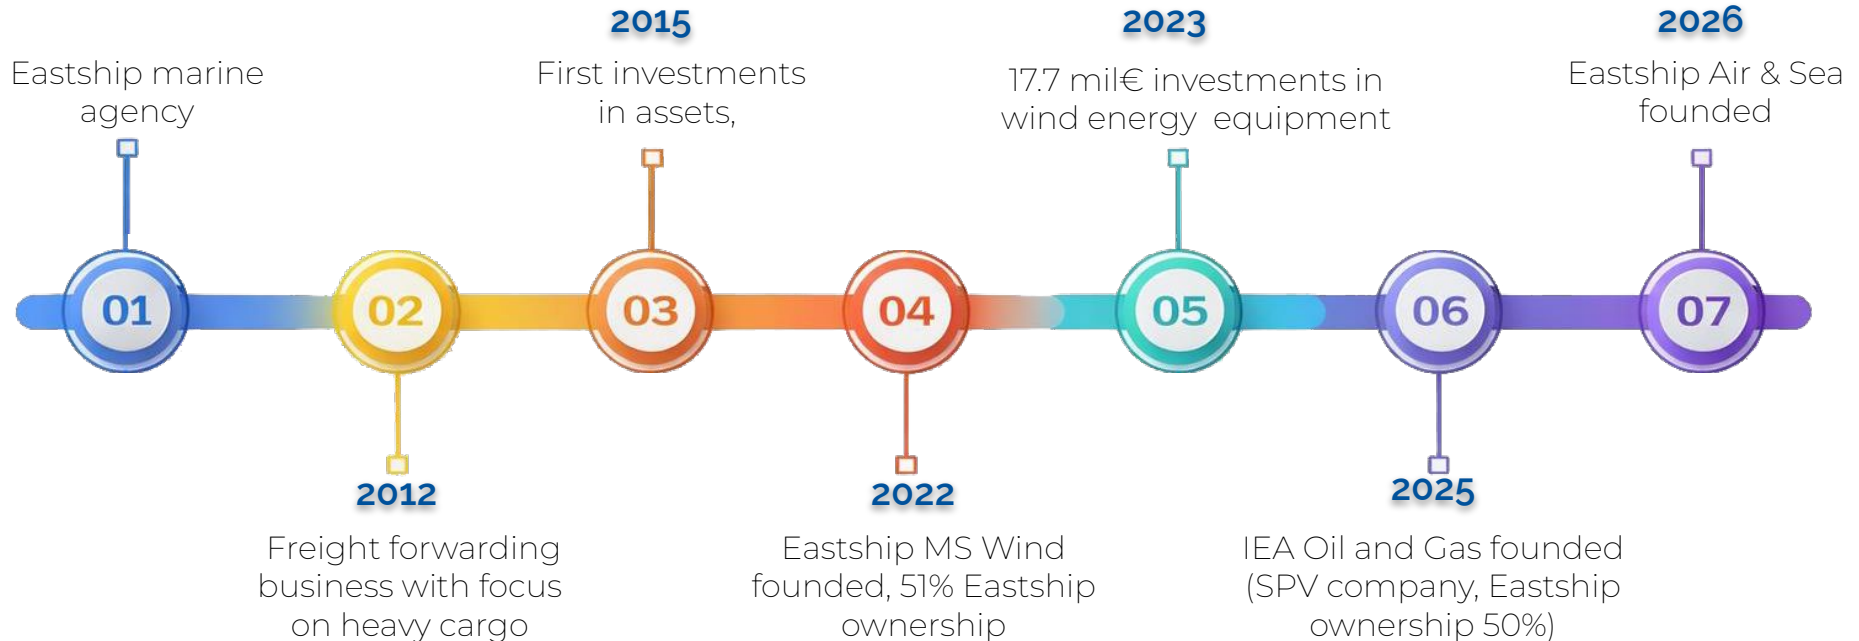

Founded on expertise.

2011

Eastship was founded in 2011 and went from marine agency to asset based freight forwarder in 2015

The company has since evolved by integrating experienced professionals, expanding its technical capabilities and operational scope.

Active in whole EU

Coverage with own resources in:

Romania

Bulgaria

Hungary

Moldova

Sustained Growth

Growth driven by increasing involvement in complex logistics operations.

Turnover in EURO (millions)	
2020	8.65
2021	10.39
2022	16.23
2023	18.63
2024	33.56
2025	59.21
2026 (projected)	65.61

Targeted expertise for every segment

To address the specific requirements of different industrial sectors, Eastship has developed specialised entities and strategic partnerships.

This approach expands our capabilities beyond core project operations, extending the same project-level discipline across a broader logistics scope

Project cargo, engineering

Air and sea freight forwarding

Wind energy logistics

Oil & gas sector support

Logistics supplier for the largest offshore gas project in Black Sea

Neptun Deep

The largest fleet for wind cargo in East Europe

Approx. 70% market share for the inland projects in the East Europe region in 2026

Preferred supplier by

Established in 2026, the company serves major general cargo clients by providing tailored logistics solutions aligned with project requirements

Assets

Trucks
8x4, 6x4, 6x2, 4x2

The largest
heavy cargo fleet
in Eastern Europe

Semi Trailers

Extendable, dirigible, lowbed
A4S8, A4S6, A4S4, A3S4, A3S3, A2S3

Goldhofer

FAYMONVILLE
TRAILERS

SCHMITZ
CARGOBULL

Kässbohrer
Driven by professionals

KRONE

242

Modular
axle lines

+ DROP DECKS,
TURNABLES,
VESSEL BRIDGES

A comprehensive portfolio
of compatible equipment
allows us to transport
almost any cargo

Other Equipment

Gottwald 6407 Mobile Harbor Crane

NCN 85 MH Reach Stackers

Operational Strength: Our Team

Due to our in-house management of complementary operations, we possess the capacity to provide **customized solutions**, exercise **meticulous control**, and demonstrate **agility** in response to evolving circumstances.

By eliminating third parties, we minimise the risk of late or low performance

- Port handling
- Engineering
- Road planning
- Barge chartering
- Project management
- Marine agency services
- Operations
- On site logistics
- Load calculations
- Storage layout plans

A reputation built on precision

We've built a reputation on engineering-led solutions, rigorous safety standards, and zero-error margins.

Rompetrol

Cogeneration plant :

- ✓ Long term predictability and reliability
- ✓ Road transport with own fleet of trucks and trailers
- ✓ Multiple simultaneous transports

Vidraru Dam upgrade

- ✓ Creative solutions
- ✓ All aspects engineered and handled by the Eastship team
- ✓ Road transport with own fleet of trucks and trailers

For movement to the dam entrance, our crew engineered and built a tailor-made trolley pulled using a jacking setup at a 52° angle.

Iernut power plant upgrade

- ✓ Multiple transports over 8 years
- ✓ Creative solutions
- ✓ All aspects engineered and handled by the Eastship team
- ✓ Road transport with own fleet of trucks and trailers

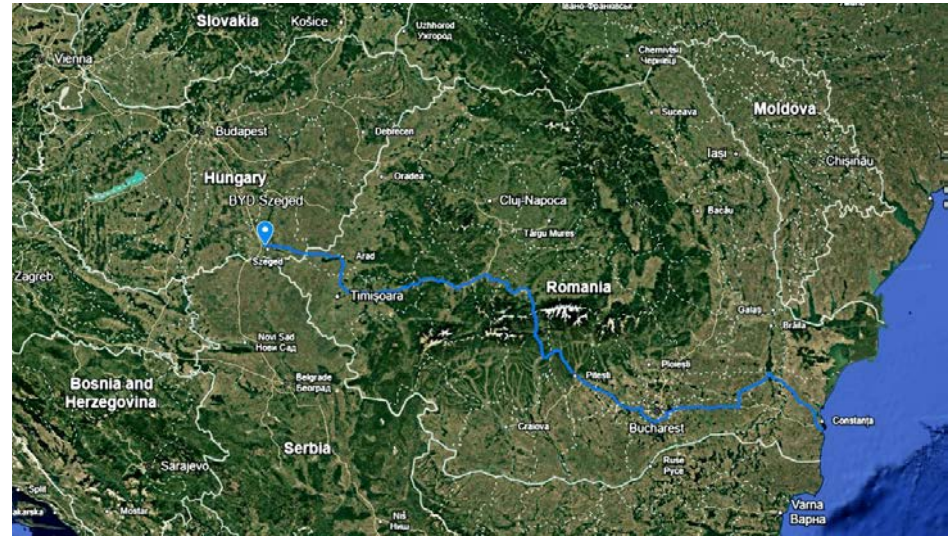

For the internal movement at the site, our crew engineered and built a tailor-made rail system using 45-ton trolleys and pulled to their final destination using a jacking and skidding setup.

BYD

Hungary factory build

- ✓ Multiple transports over 2 years
- ✓ Route of over 1000 km, from Constanta Port to BYD Szeget plant
- ✓ Road transport with own fleet of trucks and trailers

Porto Nogaro

4 heavy reactors from Italy to Romania

- ✓ Challenging loads: 3x300tons
1x795 tons
- ✓ Creative solutions
- ✓ Inside engineering

In less than one day
we provided the most
competitive solution for
such a challenging load.

Thermodyn

Romania to France

- ✓ Route of over 2000 km, from Bistrita to Creusot France
- ✓ Creative solutions
- ✓ Inside engineering

For the transportation of cargo with a width of 5.6 meters, we engineered and fabricated a custom transport platform designed to accommodate the load in an inclined position, ensuring compliance with clearance restrictions along the route

HVT transport

to the Cernavoda Nuclear power plant

- ✓ High HSEQ standards
- ✓ Short delivery time frame - only 3 days
- ✓ Multimodal transport:

Transshipment from ship to barge performed directly onto modular axle trailers, followed by Ro/Ro discharge at Cernavodă and final delivery by road transport to the Nuclear Power Plant.

- ✓ Inside engineering
- ✓ Road transport with own fleet of trucks and trailers

en Energo
Nuclear

Over 45 HVTs

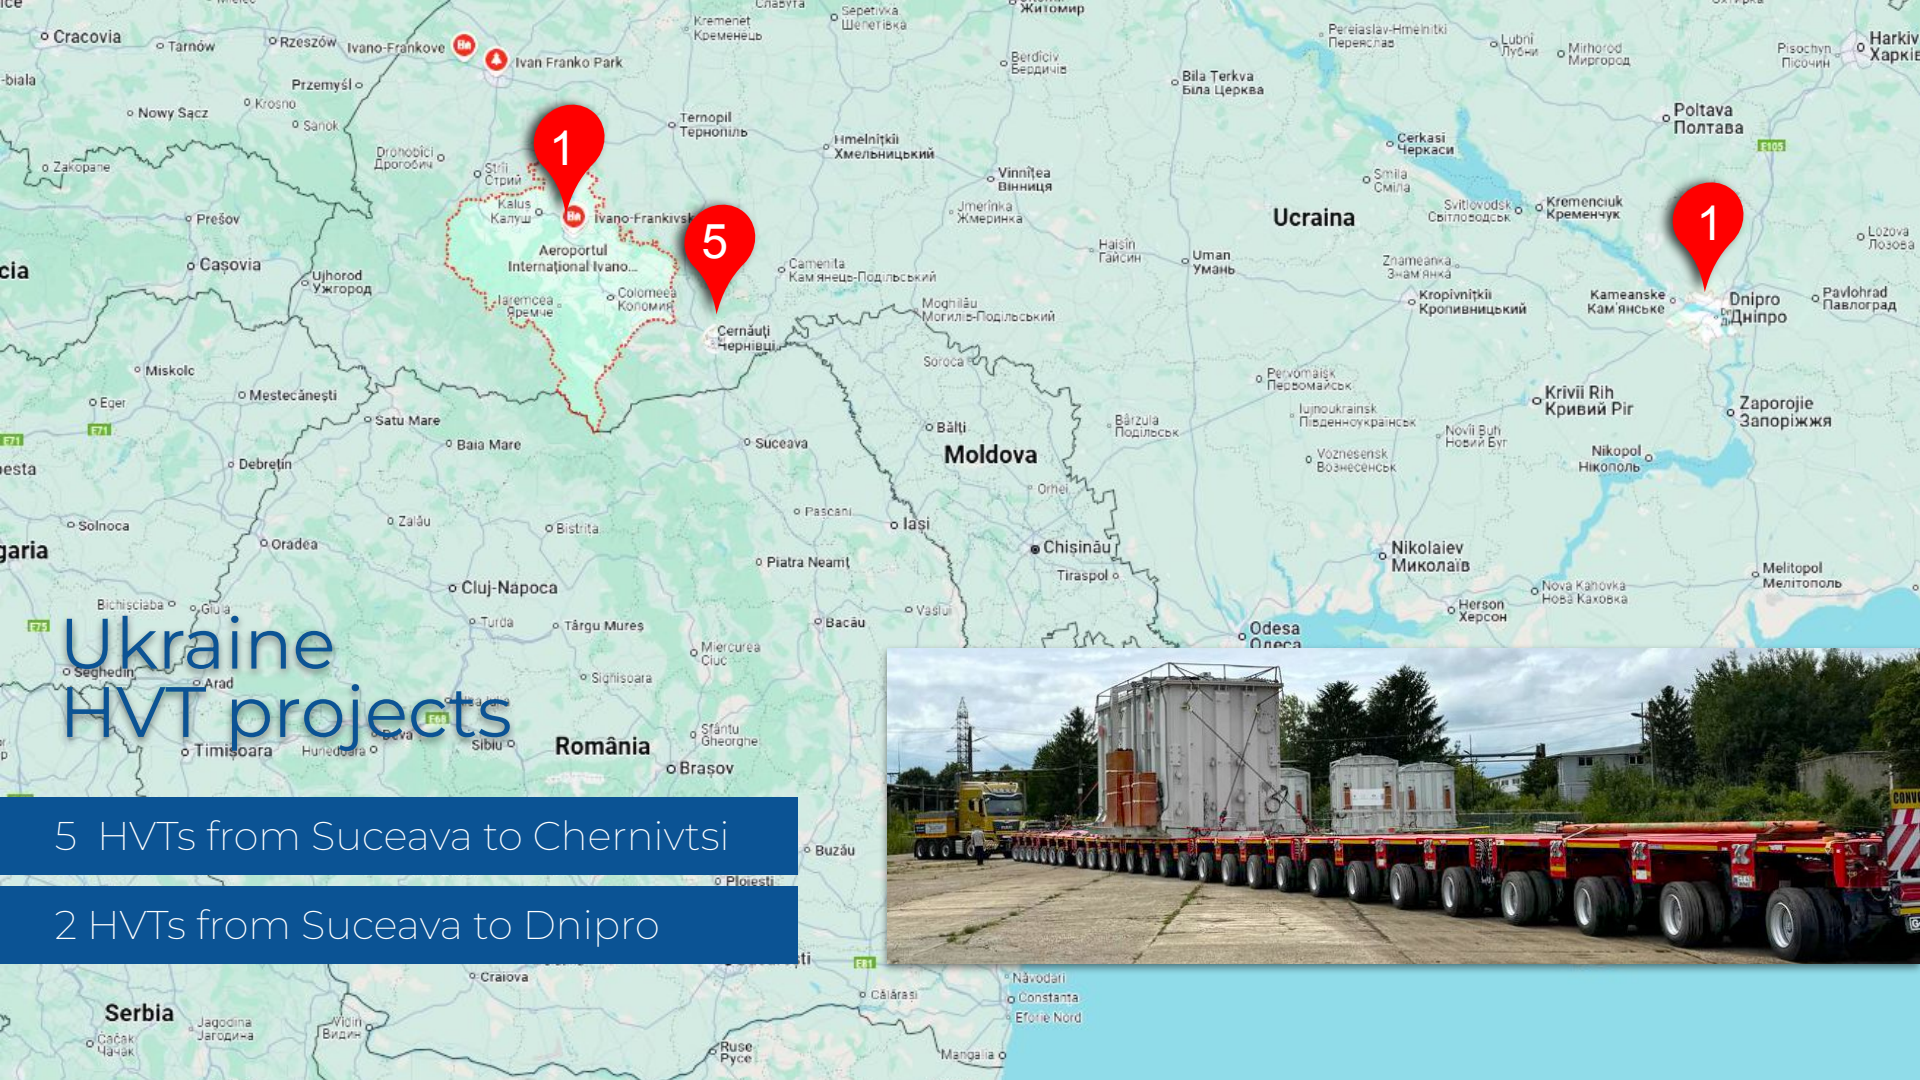

transported in 2024-2025

- ✓ No cranes required for placement
- ✓ Specialised Equipment
- ✓ Dedicated team
- ✓ Transport with own fleet of trailers and trucks

Placement using
Jacking and skidding
method

Ukraine HVT projects

5 HVTs from Suceava to Chernivtsi

2 HVTs from Suceava to Dnipro

Health, Safety, Environment and Quality, (HSEQ) policy

We are committed to ensuring that our employees and partners are well-trained and adhere to strict regulations to prevent accidents and minimize the environmental impact. Additionally, we maintain high quality standards in all our services to meet the needs of our clients.

Our priorities are:

- Uncompromising focus on safety
- Employee engagement
- Customer satisfaction
- Continual improvement
- Minimizing environmental impact
